

Plati intend to successful business results, aiming to be leader in its business sector.

Our target is to:

**meet, maintain and possibly exceed,  
all expressed requirements,  
and achievable unexpressed expectations  
of our customers, both internal and external,  
in our products and all our activities,  
in respect of the Law,  
the principles of our Code of Conduct  
and of the Environment.**

Attention of environment part of our strategy.

Respect and protection to environment is inherent part of every our activities and actions.

In active way all our organization participate to prevent environmental issues, according to the Law, and methods” and the “principles of organization” proposed by the International Standards ISO 14001.

We want to supply to our Customer products that are according to their requirements but also compatible with the highest environmental standards.

Plati Group decided set environmental targets, monitor our result to guarantee that are reached and, possibly, exceeded.

To reach the targets Plati Group is involved into:

- Plan and implement actions with continuous improvement approach to minimize possible negative impact on environment (always in respect to the law and regulations)
- Make our sites and their processes more and more respectful of the environment, to reduce the use of natural resources, energy, and to limit possible contaminations and wastes of our production.
- To possibly choose raw materials and support materials in respect of environment
- To train our personnel about our environment rules and involve them in regards of their activities’ environmental impact and possible benefit
- To assure the cooperation with local ruling and inspection institutions
- To spread to our Customers and Suppliers the will to participate in active environmental approach

Top Management is engaged to provide the necessary resources to support what defined in our Environmental Management System and all the organization to involve in actively maintain and aim to continuous improvement of our results toward the Environment.

**Dr. Lennart Schley**
